### **DETAILED ACTION**

1. This communication is in response to the Applicant's Remarks filed 13 March 2008. Claims 1-40 are being reviewed. Claims 1, 30, 39 and 40 are independent claims. In view of Applicant's claims, the election to one of the following inventions is deemed necessary. The restrictions cited are as stated below:

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-29 and 39-40 are drawn to a computer-implemented method for determining a cost basis associated with a plurality of shares of a security, comprising the steps of: entering security information

Determining price per share information

Retrieving capital events

Shares held adjustment ratios

Determining current cost basis

Finding an intermediate cost basis.

II. Claims 30-38 are drawn to a computer-implemented method for determining a cost basis associated with a security, comprising the steps of:

Receiving security information

Determining an original basis

Applying capital events

Determining a corrected cost basis.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the subcombinations have separate utility such as:

I. determining various shares-held adjustment ratios for capital events; notifying the user of various capital events.

II. determining a corrected cost basis when the user does not know the purchase price, the purchase date, sale price or sale date.

See MPEP § 806.05(d).

4. The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. The independent claims in each Group I-II recite limitations that are not found together in a common independent claim of the other group, thus it is evidence that Applicant believes a distinct invention combination lies within each set of independent claims. Also, dependent claims then append a multiple of distinct inventive concepts for which Applicant's submission is evidence that Applicant believes each supports a distinct reason for invention. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different concepts, restriction for examination purposes as indicated is proper. Applicant is advised that the response to this requirement to be complete must include an election of one of the inventions I-II to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

9. A shortened statutory period for response to this action is set to expire 1 (one) month and 30 (thirty) days from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
